SKILLS

- **Languages:** Python, C++, R, MATLAB, TI-Basic, JavaScript
- **Data and ML:** Tableau, Pandas, NumPy, Scikit-Learn, Statsmodels, SciPy
- **Frameworks/Tools:** SupaBase, MySQL, PostgreSQL, Redis, Flask, Psycopg3, Docker, Git
- **Technologies:** CI/CD, REST APIs, Pipelines, Model Construction

EDUCATION

Texas A&M University, College Station, Texas

May 2027

Bachelor of Science in Data Engineering

Minoring in Statistics and Mathematics

Major GPR: 3.53

WORK EXPERIENCE

Handshake AI, San Antonio, TX

May 2026 – Current

AI Worker

- Evaluated AI-generated responses against company rubrics to improve model output accuracy, alignment and quality.
- Developed complex data-driven problems to stump top AI models by setting traps and requiring fine nuance.

JD Lawn Services, San Antonio, TX

June 2023 – August 2025

Co-Owner

- Co-managed and led operations for multiple landscape contracts, performing mowing, trimming, debris removal, and maintenance across multi-acre sites while improving client properties with design, mulch, or plant installations.

Outlier AI, San Antonio, TX

June 2024 – August 2024

LLM Writer and Editor

- Edited and optimized multiple AI-generated LLM responses by enhancing factual accuracy, clarity, and model precision through strict, structured peer review and research-based quality improvements.

PROJECTS

NYC Restaurant Inspection Pipeline

March 2026

- Built a full data pipeline with CI/CD Git workflows using REST APIs, SupaBase buckets and tables, data cleaning scripts, GitHub Actions, and Streamlit Community Cloud to extract, filter, and present up to date public NYC restaurant inspection data.

Roni's Restaurant Data Analyst Project

November 2024

- Analyzed over 10,000 customer orders to extract statistical insights for marketing and operations and developed a Tableau dashboard to visualize key trends and support data-driven decision-making.

GPU Web Scraping and Historical Analysis

May 2025

- Engineered an automated pipeline using Selenium, ChromeDriverManager, HuggingFace, and ARIMA to scrape and forecast GPU market price trends, building predictive insights from historical eBay data.

Mai Shan Yun Restaurant Dashboard

January 2026

- Created an interactive local web application that connects with an API and local database to create orders, update in-house menu item availability, and send and store orders to the system in real time.

ACADEMIC EXPERIENCE

Texas A&M Hackathons, College Station, TX

November 2024 – Current

Participant, Team Lead

- Led a team of developers to design and prototype logistics optimization software and websites under tight deadlines, competing against 30+ teams and delivering functional solutions within 48 hours.

Hart Hall Community Council, College Station, TX

September 2023 – Current

Chair of Hall Resources

- Directed management of community spaces and equipment for 250+ residents, collaborating in weekly meetings to plan and execute hall-wide events, fostering engagement and improving resource accessibility.

HONORS

Texas A&M University Datathon Winner – 3rd Place; Roni's Challenge

November 2024

Texas A&M University Presidents Achievement Scholarship – Recipient

August 2023 – Current
